

**FERROUS CHLORIDE SOLUTION**

No: FO23002

Issued : May 95

Revised: Jan 06

Appearance:	Pale Green Liquid Characteristic Iron Odour	
	Specification Range	Typical
Density at 20°C, kg/l	1.22 - 1.28	1.24
Ferrous Chloride, % w/w	22 - 24	22.7
Ferric Chloride, % w/w	1.0 max.	<0.5
Iron, % w/w	9.7 to 10.7	10.0
Free Acid as HCl, % w/w	2.5 max.	0.8

**Methods of Analysis**

Water Treatment Solutions Ltd. will be pleased to supply details of analytical methods on request.

**Reason for Revision**

Change from specific gravity to density & to add iron content. Density limits & typical derived from composition.
