Champion Stabilised Chlorine Granules 55%

Chemical Name: Troclosene Sodium, Dihydrate

Pack Sizes: 12 x 1 kg, 6 x 2 kg, 2 x 5 kg, 1 x 10 kg, 1 x 25 kg

Application: Champion Chlorine Granules with a built in stabiliser are used for the disinfection of spa and swimming pool water.

Dose Rates: 1.8g Champion Chlorine Granules to 1 cubic metre of spa or pool water. This daily dose rate is offered as a general guide for private spas and pools. Heavily used spas and pools or those maintained at higher temperatures may require increased dosage. Test for actual requirements by using a poolside test kit – adjusting the dose rate as necessary to maintain a chlorine level of 1-3 ppm or mg/litre.

Champion Chlorine Shock Granules 65%

Chemical Name: Calcium Hypochlorite

Pack Sizes: 6 x 2 kg, 2 x 5 kg, 1 x 10 kg, 1 x 25 kg

Application: Champion Chlorine Shock Granules (Calcium Hypochlorite) provide a convenient method for treating and shock dosing swimming pools.

Dose Rates: 18g Champion Shock Granules 65% to 10 cubic metres of pool water. This daily rate is offered as a general guide for private pools. Heavily used pools and those maintained at higher temperatures will require increased dosage. Test for actual requirements by using a poolside test kit – adjusting the dose rate as necessary to maintain a minimum free chlorine level of 1-3ppm or mg/litre.

Champion Small Chlorine Tri-chlor Tablets (20gm)

Chemical Name: Trichloro –1,3,5 – Triazinetrion

Pack Sizes: 6 x 2 kg, 2 x 5 kg, 1 x 10 kg, 1 x 25 kg

Application: Champion Small Chlorine Tablets are slow dissolving and suitable for use in both private pools and small school or hotel pools.

Dose Rates: Add 2 Champion Small Chlorine Tablets (14-20gm) to 10 cubic metres of pool water when used in the skimmer basket. The dose rate is offered as a general guide for private pools. Heavily used pools or those maintained at higher temperatures may require increased dosage. Test for actual requirements by using a poolside test kit – adjusting the dose rate as necessary to maintain a chlorine level of 1-3 ppm or mg/litre.

Champion Multifunctional Tablets

Chemical Name: Trichloro –1,3,5 – Triazinetrion

Pack Sizes: 6 x 2 kg, 2 x 5 kg, 1 x 10 kg, 1 x 25 kg

Application: Champion Multifunctional Tablets are slow dissolving and suitable for use in both private pools and small hotel or school pools. They act as a disinfectant, algaecide and flocculant in one.

Dose Rates: Add 1 Champion Multifunctional Tablet to 45 cubic metres of pool water when used in the skimmer basket. The dose rate is offered as a general guide for private pools. Heavily used pools or those maintained at higher temperatures may require increased dosage. Test for actual requirements by using a poolside test kit – adjusting the dose rate as necessary to maintain a chlorine level of 1-3 ppm or mg/litre.

Product Code	Pack Size	Price

CLR0011BG	1 x 25 kg	

Champion Multifunctional Chlorine Granules

Chemical Name: Trichloro –1,3,5 – Triazinetrion

Pack Sizes: 4 x 5 kg

Application: Champion Multifunctional Chlorine Granules are ideal for the daily chlorination of pools and spas, particularly outdoors, as they contain a stabiliser, to reduce the loss of chlorine to sunlight, an Algaecide to help prevent the pool going green and a flocculant to aid the filtration system in keeping the pool sparkling clean.

Dose Rates: 18g of Champion Multifunctional Granules treat 10 cubic metres of spa or pool water. This daily dose rate is offered as a general guide for private spas and pools. Heavily used spas and pools or those maintained at higher temperatures may require increased dosage. Test for actual requirements by using a poolside test kit – adjusting the dose rate as necessary to maintain a chlorine level of 1-3 ppm or mg/litre.

Sanitisers

Champion Bromine Tablets

Chemical Name: BROMO CHLORO-5, 5-DIMETHYLIMIDAZOLIDINE -2, 4-DIONE

Pack Sizes: 2 x 5 kg

Directions for Use

These tablets are designed for use with a Bromine Feeder. When feeder device requires refilling with tablets always follow manufacturers instructions. Ensure tablets used in the feeder are of the same chemical (Bromo-Chloro-5, 5-Dimethylimidazolidine - 2, 4-Dione). If other materials have been used previously, wash out feeder thoroughly before adding tablets. Adjust feeder to ensure constant bromine residual is present in the pool or spa.

Dose Rates

Check bromine levels regularly with a test kit and maintain a bromine residual of 2-4mg/l (ppm) for domestic spas/pools. Check ph value regularly with a test kit and maintain level of 7.2 and 7.6.

General precautions

Never mix with any other chemicals including cleaning products, weedkiller and other chlorine products as a dangerous reaction may occur. Always handle products in a well-ventilated area, preferably outdoors. Always wash hands thoroughly after handling pool chemicals. Store in a cool, dry place. Ensure chemicals do not become damp in storage. Instruction and dosages given are a guide to most effective use.

BRO0003MCA	2 x 5 kg	

Champion Spa Bromine Granules

Chemical Name: Trocolesene Sodium, Dihydrate

Pack Sizes: 12 x 1 kg

Application: Champion Bromine Granules can be used to effectively sanitise and disinfect your spa.

Dose Rates: As an initial dose, add 27g Champion Bromine Granules to 1 cubic metre of water. To maintain a spa at 3mg/litre or ppm, add 6.5g Champion Bromine Granules per 1 cubic metre of water.

Product Code	Pack Size	Price
BRO0008BQ	12 x 1 kg	

Sanitisers

Champion Non Chlorine Shock / Oxidiser

Chemical Name: Potassium Monopersulphate

Pack Sizes: 12 x 1 kg, 6 x 1.5 kg, 2 x 5 kg,

Application:

Champion Non Chlorine Shock is a non-chlorine based sanitiser used to disinfect pool and spa water.

Dose Rates:

For Spas as an initial dose, with the filter pump running, sprinkle 200g of Champion Non Chlorine Shock on the water surface. Every 2 –3 days, add 75-100g to the water surface. Current guides suggest domestic spas should be drained and cleaned every 3 months. For Pools initial/shock dose with 700gms per 45 cu meters and add 350gms every 3days. Use a test kit to maintain a level of 3ppm/mgl

Important Note

It is very important that there are no bathers present in the pool or spa when dosing chemicals.

Sanitisers

Champion Liquid Shock

Chemical Name: Sodium Hypochlorite

Pack Sizes: 2 x 5 ltr

Dose Rates:

Champion Liquid Shock is used for the shock treatment of pool or spa water to control unusually high levels of pollutants or algae introduced by the environment or bather and also as a preventative shock.

This product can also be used as a regular sanitizer.

The table below can be used as a dosing guide

Approximate Shock and Daily Doses

Pool/Spa Capacity Gallons	Pool /Spa Capacity Cubic Metres	Routine Litres	Shock Litres
1,000	4.50m ³	0.06	0.60
5,000	22.5m ³	0.30	3.00
8,000	36,00m ³	0.48	4.8

Water Balance

Champion Alkalinity Increaser

Chemical Name: Sodium Bicarbonate

Pack Sizes: 12 x 1 kg, 2 x 5 kg, 1 x 25 kg

Application: Use Champion Alkalinity Increaser to raise the alkalinity of swimming pool or spa water to between 80 and 120 ppm or mg/litre, thus helping to prevent wide swings of pH which can cause damage to the pool and its equipment.

Dose Rates: 200g of Champion Alkalinity Increaser per 10 cubic metres of water.

Product Code	Pack Size	Price
SBC0014MA	12 x 1 kg	
SBC0015MC	2 x 5 kg	
SBC0014NA	1 x 25 kg	

Champion PH Increaser

Chemical Name: Sodium Carbonate

Pack Sizes: 12 x 1 kg, 6 x 2 kg, 2 x 5 kg, 1 x 25 kg

Application: Use Champion pH Increaser to raise the pH of swimming pool and spa water. The pH of the water should be correctly maintained to ensure bather comfort and the protection of the pool or spa and its equipment.

Dose Rates: 100g of Champion pH Increaser per 10 cubic metres of water.

Water Balance

Champion PH Reducer

Chemical Name: Sodium Bisulphate, Powder

Pack Sizes: 12 x 1 kg, 2 x 7 kg, 1 x 25 kg

Dose Rates: Use Champion pH Reducer to lower the pH of swimming pool water and to reduce the alkalinity. The pH should be correctly maintained to ensure bather comfort and the protection of the pool and its equipment.

Application: 100g of Champion pH Reducer per 10 cubic metres of water.

Product Code	Pack Size	Price
SPA0010MA	12 x 1 kg	
SBS0003MCA	2 x 7 kg	
SBS0003NA	1 x 25 kg	

Champion Water Hardener

Chemical Name: Calcium Chloride

Pack Sizes: 2 x 5 kg, 1 x 25 kg

Application: Champion Water Hardener can be used to help prevent the corrosion of equipment, fittings and general finishes in 'soft' water swimming pools.

Dose Rates: To increase calcium hardness by approximately 10ppm, add 150g Champion Water Hardener to 10 cubic metres of pool water.

Product Code	Pack Size	Price
CCH0006MC	2 x 5 kg	
CCH0006NA	1 x 25 kg	

Water Balance

Champion Chlorine Reducer

Chemical Name: Sodium Thiosulphate

Pack Sizes: 2 x 5 kg

Application: Champion Chlorine Reducer is a fast acting, cost effective agent for reducing the chlorine level in a swimming pool.

Dose Rate:

Ppm (mg/l)	1,000 gal 5m ³	5,000 gal 23m ³	10,000 gal 45m ³
1	25g	115g	225g
5	125g	574g	1.12g
10	250g	1.149g	2.247g
20	500g	2.5g	4.5g

Product Code	Pack Size	Price
STH0007MC	2 x 5 kg	

Champion Chlorine Stabiliser

Chemical Name: Cyanuric Acid

Use Champion Chlorine Stabiliser in swimming pool water to protect against the rapid loss of chlorine to sunlight.

Pack Sizes: 2 x 4 kg, 1 x 25 kg

Application: Use once only at the start of the season or when a pool is filled or refilled with fresh water. Carefully add Champion Chlorine Stabiliser into 10 litres of fresh water, using a clean plastic container (NB the powder will not dissolve fully). Slowly pour the solution into the pool water as evenly as possible and rinse out container thoroughly

Dose Rate: 300 g of Champion Chlorine Stabiliser to 10 cubic metres of pool water in very strong sunlight areas of the world, and where Sodium or Calcium Hypochlorite is used for pool water disinfection the dose rate noted above should be doubled.

CYA0005MC	2 x 5 kg	
CYA0005BG	1 x 25 kg	

Water Balance

Champion Spa No Foam

Chemical Name:

Pack Sizes: 12 x 1 ltr, 6 x 2 ltr

Application: Champion Spa No Foam has been specially designed for spa pools to control and prevent foaming.

Dose Rate: Either initially or on refilling the spa, add Champion Spa No Foam at a rate of 50mls per 450 litres of water. Add whilst the filtration system is running and allow to run on for at least 1 hour. Use 25mls per week or as a defoamer as required.

SPA0004NI	12 x 1 ltr	
AFO0031MH	6 x 2 ltr	

Cleaning Products

Champion Filter White

Chemical Name: Sodium Carbonate, Sodium Metasilicate, Sodium Hydroxide

Pack Sizes: 12 x 400 gm

Application: Champion Filter White is an easy to use product designed for cleaning filter cartridges.

Dose Rate:

Product Code	Pack Size	Price
FLC9001MA	12 x 400 gm	

Champion Tile & Liner Cleaner

Chemical Name: Phosphoric Acid & Propan-2-ol

Pack Sizes: 6 x 2 ltr, 2 x 5 ltr

Application: Champion Tile & Liner Cleaner is an acid based product used to assist with the removal of deposits from swimming pool scum lines.

Dose Rate: Champion Tile & Liner Cleaner should be used directly from the container in concentrated form.

Product Code	Pack Size	Price
ALG0001MH	6 x 2 ltr	
ALG0001MC	2 x 5 ltr	

Cleaning Products

Champion Spa Cartridge Cleaner

Chemical Name: Potassium Hydroxide

Pack Sizes: 12 x 1 ltr, 6 x 2 ltr

Application: Use Champion Spa Cartridge Cleaner to remove accumulations from the surface and restore the cartridge to maximum efficiency.

Dose Rate: Shake well before use. Create a solution using 1 litre of Champion Spa Cartridge Cleaner per 18 litres of water. Fully immerse the cartridges for a maximum of 6 hours. For best results, leave overnight. Remove cartridge from solution and clean down with fresh water.

Product Code	Pack Size	Price
SPA0001MA	12 x 1 ltr	
SPA0015MH	6 x 2 ltr	

Champion Spa No Scale

Chemical Name: Sodium Carbonate, Sodium Metasilicate, Sodium Hydroxide

Pack Sizes: 12 x 1 ltr, 6 x 2 ltr

Application: Champion Spa No Scale is a scale inhibitor and dispersant for use in spa baths. It also precipitates iron and other staining agents.

Dose Rate: On initially filling the spa, with the filter system running, add Champion Spa No Scale at the rate of 70mls per 450 litres of spa water.

Add Champion Spa No Scale at the rate of 25mls per 450 litres of spa water.

Note: Additions of Champion Spa No Scale should be made directly to the water at the point of water inlet to the spa. Spa bath water should be changed on a regular basis. If dissolved solids are allowed to build up, the point will be reached where scale control is not possible. Under these circumstances the water must be changed.

SPA0014NI	12 x 1 ltr	
SPA0014MH	6 x 2 ltr	

Cleaning Products

Champion Scumline Cleaner

Water-soluble, neutral, environmentally friendly, solvent-free, concentrated cleaning agent for leisure and industrial areas. Cleans all types of surfaces. It removes oils, grease, soot and other dirt, is neither toxic nor aggressive. Does not attack iron, steel, non-ferrous heavy metals, light metals and plastics. Champion Scum Line Cleaner is biodegradable and not flammable, contains no nitrite, nitrate, PCB and compounds of chlorine and is finally in line with all current EC-Laws.

Application-Areas: All areas in spas and baths, where fat, oil or grease has to be removed.

Usage: Spray the scum lines or soiled areas and leave for 3-5 min. Wipe off with sponge or cloth, then rinse or spray with water.

Dilutions: For intensive cleaning we recommend to use the product pure or 1:1 diluted. For daily cleaning we recommend 5-10% solutions with water.

Product Code	Pack Size	Price
ALG9001MP	12 x 500 ml	

Champion Poolside Deep Clean

Champion Poolside Deep Clean is specially designed for heavily contaminated poolside areas in health clubs, sport centres and leisure centres, where regular cleaning agents are not strong enough.

Champion Poolside Deep Clean removes algae, limescale, fats and other stubborn stains from tiles, stainless steel and plastic surfaces.

Application: Dilute with water according to the rates above.

Apply using a mop, brush or spray. Allow a few minutes contact time at low concentrations.

At high concentrations or when using neat, do not allow the product to settle on the surface too long as it may cause bleaching. Rinse thoroughly, taking care to minimize any contamination of the pool water.

Always test surface compatibility prior to use.

Product Code	Pack Size	Price
ALG0012MP	12 x 1 ltr	

Cleaning Products

Champion Spa Polish & Cover Cleaner

Champion Spa Polish is a heavy-duty fat, grease and dirt remover specially designed for spas. Champion Spa Polish easily removes human fats and grease, without being aggressive or harmful to the spa surface or to bathers. Champion Spa Polish will remove nicotine, grease and general grime from floors and walls on both hard and synthetic surfaces.

Directions:

Spray on the affected surfaces and leave for a few minutes and polish off with a cloth or sponge. On Spa Covers spray onto the surface, leave for 5 minutes and rinse with clean water. Using a sponge to work Champion Spa Polish into the grained surfaces of some covers can aid cleaning. A pressure washer can be used with care to assist the process and Champion Spa Polish can be used in the pressure washer. Recommended dosage 2-5 percent with hot water.

Rinsing with clean water is recommended for all cleaning methods.

Physical Data:

Density (20 °C) : 1,004 g/ml

pH - Value: 11,4 (10%)

ALG0013MP	12 x 500 ml	

Algaecide

Champion Algaecide

Chemical Name: Coco Alkyl DimethylBenzyl Ammonium Chloride

Pack Sizes: 12 x 1 ltr, 6 x 2 ltr, 2 x 5 ltr

Application: Champion Algaecide helps to prevent the growth of algae in swimming pools. Used each week it is an effective means of controlling algal growth when used in conjunction with a disinfectant.

Dose Rate

As an initial dose add: 20mls Champion Algaecide to 10 cubic metres of pool water.

Then as a weekly dose: 6mls Champion Algaecide to 10 cubic metres of pool water.

Product Code	Pack Size	Price
SPA0000CB	12 x 1 ltr	
ALG0004MH	6 x 2 ltr	
ALG0004MC	2 x 5 ltr	

Champion Longlife Algaecide

Chemical Name: Copper Sulphate

Pack Sizes: 6 x 2 ltr,

Application: Champion Longlife Algaecide will help keep your pool free from most forms of algae for between 3-6 months. It is generally used as a start-up chemical after the winter months.

Dose Rate: 500mls of Champion Longlife Algaecide will treat 10 cubic metres of swimming pool water.

Product Code	Pack Size	Price
ALG0007MH	6 x 2 ltr	

Algaecide

Champion Winterclear

Chemical Name: Diphosphonic Acid

Pack Sizes: 2 x 5 ltr

Application: Champion Winterclear is a non-copper based algaecide, designed to keep your pool free of algae for between 3-6 months.

Dose Rate: 5 litres of Champion Winterclear will treat approximately 56 cubic metres of swimming pool water for the autumn and winter months.

Before adding Champion Winterclear, it is advisable to shock dose the swimming pool with Chlorine or an alternative sanitiser

Product Code	Pack Size	Price
ALG0015MC	2 x 5 ltr	

Flocculant

Champion Filter Floc Tablets

Chemical Name: Aluminium Sulphate

Pack Sizes: 15 x 50 g tabs

Application: Champion Filter Floc Tablets are invaluable for assisting swimming pool sand filters to remove the very fine particles that cause water to become very cloudy. Removal of these small suspended particles, dead algae, calcium carbonate etc will help to produce bright, sparkling, inviting water.

Dose Rate: 2 Champion Filter Floc Tablets to 100 cubic metres of pool water (1 to 10,000 gallons)

Product Code	Pack Size	Price
FLC0103MA	15 x 50 g tabs	

Flocculant Kibbled / Granular

Chemical Name: Aluminium Trisulphate

Pack Sizes: 2 x 5 kg, 1 x 25 kg

Application: Champion Flocculant Kibbled / Granular can be used as a full floc treatment or as a filter aid by adding 500g to the skimmer after backwashing.

Dose Rate: Use 200g of Champion Flocculant to 10 cubic metres of pool water.

Product Code	Pack Size	Price
FLC0004MC	2 x 5 kg	
FLC0001NA	1 x 25 kg	

Flocculant

Champion Spa Sparkle

Chemical Name: poly diallyl methyl ammonium chloride

Pack Sizes: 12 x 1 ltr, 6 x 2 ltr

Application: Champion Spa Sparkle is an organic polymer, polisher and clarifier for treating spa water. It collects small particles, the cause of spa water cloudiness, and forms them into larger ones. These larger particles are then removed by your filtration system.

Dose Rate: Add 25mls of Champion Spa Sparkle per 450 litres of water (pre-dilute into at least 10 litres of water). Add to the spa water with the filtration system running and keep it running for at least 1 hour. Increase the frequency of this dose if your spa is used regularly. This product can be used daily and as a problem solver for a cloudy spa.

Product Code	Pack Size	Price
SPA0003MA	12 x 1 ltr	
SPA0003MH	6 x 2 ltr	

Champion Pool Clarifier

Chemical Name: n-alykl-(c12-16)-N, N-dimethyl-N-benzylammonium chloride

Pack Sizes: 6 x 2 ltr, 2 x 5 ltr

Application: Champion Pool Clarifier assists with the removal of algae and deposits from swimming pool water to achieve clarity and bright sparkling water

Dose Rate: As an initial dose add 220mls of Champion Pool Clarifier to 10 cubic metres of pool water and then each week, add 50mls of Champion Pool Clarifier to 10 cubic metres of pool water.

For heavily used pools, and where the filtration may be underrated, the routine doses may be required more often.

Product Code	Pack Size	Price
FLC0003MH	6 x 2 ltr	
FLC0003MC	2 x 5 ltr	

Flocculant

Champion Pool Sparkle

Chemical Name: poly diallyl methyl ammonium chloride

Pack Sizes: 6 x 1 ltr

Application: Champion Pool Sparkle is an organic polymer, polisher and clarifier for treating pool water. It collects small particles, the cause of pool water cloudiness, and forms them into larger ones. These larger particles are then removed by your filtration system.

Dose Rate:

Initial dose: Add 500 mls (approx 5 graduations on bottle side) per 45,000 litres / 10,000 gallons of pool water.

Regular dosage: Add 100 mls (approx 1 graduation on the bottle side) per 45,000 litres / 10,000 gallons of pool water.

Before adding the initial dose backwash filter. With the filtration system running add the initial dose, either neat or diluted with water, by the main pool outlet. Run the filtration system for a 24 hour period. For very cloudy pools an additional dose may be required. For best results vacuum the pool.
